

Hamanasi Great House project – moment of truth!

02/22/14

February 22nd 2014, a much awaited day at Hamanasi Resort was greeted by beautiful weather and for this we give thanks.

By 7am the metal components for the roof structure had been taken to the work site and the main players had arrived on site and by 7:30 the work had started moving along.

Phillip and his crew started separating and sorting out the metal and wood components with Doug supervising. By 9:30 the first turnbuckle had been installed on the first Great Truss and by 9:38 the first hip truss had been picked up and set on the grounds so that they could be prepped. At 11:15 the first main truss having been prepped, was moved from the set of 3 and set on the ground ready for its final destination

9:30

9 

11:15 moving the main truss

11:30 spraying the sand with water for the crane

At 11:25 Launce came to inform that all guests had checked out and gave the green light to begin the long awaited process to assemble the roof, and then the excitement began with everybody rushing to their positions as per the work plan. Everybody wanted to be a part of this and even the dive shop crew came in to give a helping hand

1 pm the crane arrives at its spot and by 2:15 pm it is getting ready to do its special job

All hands helping to bring parts close to site @ 2:50

and the big guy reporting for duty @ 2:56

Testing the communication procedure among all 3 main players and calculating distances

And at **3:45** the first Great Truss was being picked up to begin its final trip to its final destination

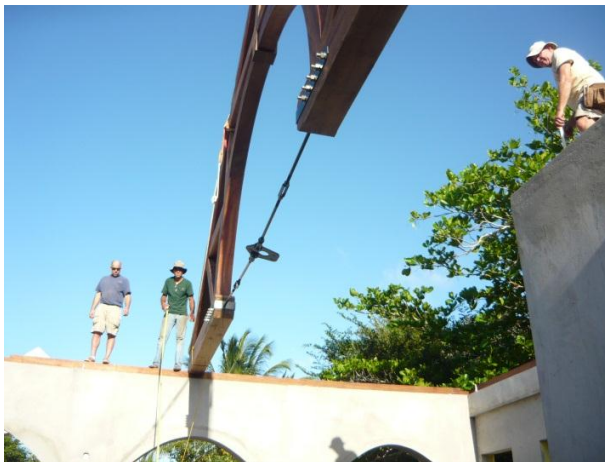

Doug the roof designer and Leon guided and accompanied the Great Truss along the trail and arrived @ **4:pm.** Leon climbed up to transfer the truss from the sky trak to the Crane.

And The Great Truss was airborne at **4:13 pm**. Doug and Phillip were waiting to receive it

And the moment of truth finally came **@ 4:20pm!!** It fit as it was carefully planned and built to be.

Doug, Phillip and Jon doing final inspections and bolting it down. We are on schedule!

End of a very important day and end of report for today February 22nd 2014
